- Padded Covers
- Custom Products

A Great Value for One of the Most Durable Covers Available

Innoplast BollardGard bollard covers are a quick way to improve your facility, while reducing maintenance costs. They are a great alternative to painting steel bollards while saving you time, expense and labor. The bollard covers easily slide over the top of your current post and are secured in place with our patented GripperTabs™.

Order Online at INNOPLAST.com or Call 800-516-9287

BollardGard™ Bollard Covers

Available in a variety of stock colors, diameters and lengths that ship out in 1-3 business days. We also have the ability to color match with a minimum order.

Decorative Bollard Covers

Elegant granite-like finishes are a must have alternative to real stone, concrete or granite bollards without the expense. Plus, no large equipment is required for installation.

Square Bollard Covers

The straight edges and peaked top add a sharp clean look to your existing post. Available in a variety of standard and granite colors.

5 YEAR
Warranty
Against Cracking
& Fading

UV stable and guaranteed against fading and cracking for 5-years.

Lower Parking Lot Maintenance Costs with Innoplast Parking Blocks

Parking blocks are used to let drivers know they cannot pull any further into a parking space. This helps reduce damage to curbs and other vehicles in the parking lot. Our parking blocks are available in plastic or rubber in a variety of colors and lengths.

Rubber Parking Blocks

- Recycled rubber
- Conforms to concrete or asphalt
- Molded reflective yellow stripe for increased visibility
- Hardware sold separately

Plastic Parking Blocks

- Chemical and weather resistant
- 100% recycled content
- Available with or without channels
- Hardware included

Ultra Parking Blocks

- Chemical and weather resistant
- 100% recycled content
- Light weight, yet stable
- Hardware included

Model #	Description	Dimensions	Weight	Available Colors

Easy to Install Speed Bumps and Humps Help Control Motorists

Improve safety by using traffic calming speed bumps and humps designed to help reduce the speed of vehicles on your property while improving the safety for pedestrians and other motorists. A well placed speed bump should serve as a reminder to motorists to reduce speeds to 2-5 MPH when crossing over.

Standard Plastic Speed Bumps

- Chemical and weather resistant
- 100% recycled content
- Pre-drilled holes for easy installation
- Hardware included

Rubber Speed Humps

- Molded from recycled material
- Flexible design conforms to road surface
- Slows traffic to 10-15 mph
- Hardware sold separately

Rubber Speed Bumps

- Recycled rubber
- Conforms to concrete or asphalt
- Cat-eye reflectors, increase nighttime visibility
- Pre-drilled holes for easy installation
- Includes two 1" channels to allow for cabling or drainage
- Hardware sold separately

Black Rubber End Cap

- Rounded edges create a smooth transition from end cap to speed bump
- Two 1" prongs slide into the channels of the rubber speed bump

BollardFlex™

BollardFlex is impact resistant with 360 degrees of flexibility. The 1-5/8" steel pipe is covered with a 7" bollard cover for increased visibility. The rigid appearance deters vehicular contact in parking lot areas.

- Eliminates replacement costs and damage to parking lot surfaces
- Withstands high winds
- Delineates when hit
- Handles steel regulatory signs
- Installs in minutes

GorillaPost™

Perfect for installation where pedestrian walkways intersect vehicular roadways or emergency access points.

- Temporarily folds on impact
- Safe for post-tensioned concrete floors
- Magnetic post can be temporarily removed from the ADA-compliant base
- Permanent installation also available

BollardGard Anywhere™

BollardGard Anywhere consists of a heavy-duty rubber base and a 4" or 7" bollard cover. These are great for use in temporary situations as the cover can be removed from the base for easy transport.

**Ring Top Delineator**

The Ring Top portable delineator is a two-piece design consisting of a HDPE tube and a 12 lb. rubber base. The easy to grab handle provides quick set-up for a variety of applications.

**Removable Stainless & Powder Coated Bollards**

Stainless and powder coated, removable bollards are a low maintenance solution, which add a modern design to any location. These steel bollards lock into place with a special key to help prevent tampering and reduce theft.

Locking Deter -A-Post
& Helix Locking Post

HDPE removable bollards are a light-duty vehicle deterrent built to enforce traffic control. These plastic removable bollards are designed to withstand vehicle impact as well as to minimize the vehicle's damage.

Two-Way Bollards
(Folding Bollards)

Control vehicle access with folding security bollards. Easily collapses in two directions, leaving a low clearance that is ideal for emergency vehicle access.

Horseshoe Bollards

Flexible polycarbonate guardrails attach to SlowStop Bollards to create virtually unbreakable barriers. Twice the stopping power of our single rebounding bollards. Two single rebounding bollard bases with steel pipe and connectors create a horseshoe bollard.

SlowStop Bollards

A rebounding steel bollard system that absorbs energy from the impact, reducing damage to vehicles, assets, and personnel involved in the collision. A flexible polycarbonate guardrail to the SlowStop Bollard to create a virtually unbreakable barrier.

Stainless Bollards

Add a clean, contemporary touch with virtually no maintenance to any location. The fixed bollard can be embedded in concrete creating a permanent, attractive, finished product.

Surface Mount Steel Bollards

Protect store fronts, gas pumps, parking areas or machinery with our bolt down bollards. Laser cut holes allow for easy installation.

U-shaped Bollards

Primed and stainless steel U-shaped pipe guards, also known as horseshoe bollards, are used to protect property and expensive dispensers from traffic collisions.

Guide and Direct Traffic

Help keep things organized and moving smoothly in your parking lot. From pedestrian signs to stop signs, to sign posts to delineators, our variety of options will help guide traffic and pedestrians in a safe and efficient manner.

Multipurpose Post & Tuff Post

- Reactive spring assembly that rebounds to upright when struck
- Post is used to simulate bollards while still allowing emergency vehicle access
- Constructed of flexible plastic that is resistant to: ultraviolet light, ozone, and hydrocarbons

Pedestrian Signs

- Anti-twist reactive spring assembly that rebounds to upright when struck
- Double sided
- Plastic fixed base or rubber portable base available

Stop Sign

- Anti-twist reactive spring assembly that rebounds to upright when struck
- Post and panel is constructed of flexible polyethylene plastic
- For permanent use within parking lots and parking garages

STA-Rite Aluminum Sign Post

- White powder coated aluminum post, with or without outer yellow plastic bollard
- Light weight, yet durable
- Anti-twist reactive spring assembly that rebounds to upright when struck

Boomerang Post

- Meets all state specifications for two-way, two-lane delineators
- Stress from impact transfers to the base, giving longer service life to the HDPE tube
- Perfect for parking lots, islands, work zones, concrete barriers, and bridges

Repo Post

- Surface mount for temporary or permanent installations
- ABS base made from 100% recycled material
- Ideal for work zones, parking lots and islands for traffic delineation

Rack Sentry

Protect your rack uprights from collisions with forklifts. This highly visible layer of protection is easily installed without tools and is designed to absorb impact by flexing.

Corner Sentry

Industrial corner protectors absorb the impact, reducing or eliminating damage to both the corner and to the vehicle. Tapered to provide protection to the corner while keeping a low profile.

Column Sentry

Column protectors save interior building columns by surrounding them with a cushion of air. Easy to install without using any tools and is extremely effective at column damage prevention.

PSR-045-B-CTN	Park Sentry Round Plank Black (3) each	1" thick x 27.6" w x 39.3" tall	12bs	Black

Park Sentry

Add a layer of effective protection around parking structure columns and interior building columns, protecting both the column and vehicle from collision damage.

**PoleTector™ 360**

Make old lots look new and new lots look complete! PoleTector is a protective light pole base cover that enhances the appearance of your parking lot, creating a better visual appearance, while also lowering long term maintenance costs.

**BumperWrap™**

Conform to almost any shape with this vinyl extrusion wrap. Great for custom applications that have odd sizes or shapes. Car dealers, car washes and retail shopping centers find it ideal for use on light pole bases.

**ClearanceGard™**

Overhead clearance bars, available in standard or economy, effectively warn drivers against accidental collisions in warehouses, parking garages, car washes, drive thru locations and other low clearance applications.

Increase Visibility and Add Protection with Padded Covers These cushioned products add just the right amount of padding to help reduce damages. Available in a variety of sizes and colors to fit most standard applications or can be custom made to fit your individual needs.

- 1/2" polyethylene foam core
- 10 oz reinforced rip-stop nylon cover
- 2" sewn bands of Retro-Reflective material

Gate Arm Covers

Add visibility and protection for your incoming and outgoing traffic. Fits standard moving gate arms that are made from plastic, wood or metal 1" W x 4" H.

Padded Column Wrap

Help protect your columns or beams from damage and continuous maintenance. Dense foam center for added protection and secures in place with a Velcro attachment.

Bollard Post Soft Padded Covers

Take the softer approach with our padded bollard covers. The foam center helps cushion the impact of unexpected contact while the retro-reflective bands increase nighttime visibility.
