

## Installation Instructions for Park Sentry Round

Park Sentry round installation is easy. Just follow the steps:

1. Measure the column
2. Cut the Park Sentry panels if needed to fit the column. Cut the panel on the slot side to keep the tabs intact.
3. Connect panels, if necessary, using the integrated tabs and slots.
4. Wrap with the adjustable reflective straps and pull tight against the column. If using the locking cinch buckle, snap the lock shut.
